Github: github.com/shinaeli

A self-taught front-end developer looking to leverage my little experience building responsive and scalable web apps to solve interesting problems that delight end-users.

Web developer skills acquired while studying

- Comprehensive knowledge of HTML5, CSS3, SASS, JavaScript, jQuery, Git and ReactJS.
- Creating websites that are user-friendly, responsive, effective and appealing.
- Creating quality web pages.
- Producing, modifying and maintaining websites and updating web applications.
- Testing websites, identifying and solving technical problems.

Key Competencies

- Providing innovative new ideas and solutions to problems.
- Ability to juggle priorities and multiple projects.
- Learning new technologies and keeping abreast of new developments.
- Creativity and imagination.
- Adaptable and able to pick up new techniques.
